

Software Developer / Analyst

Intersoft Electronics is a Belgian engineering company active in the domain of air traffic control (ATC) and air-defence radar. It is our mission to create and deliver cutting edge solutions in these fields and enable our customers to achieve comprehensive and reliable radar coverage leading to safer airways. Our products and services are used worldwide thanks to our global presence with subsidiaries in Australia, the US and the UK. We are currently looking for a:

SOFTWARE DEVELOPER / ANALYST

The Intersoft Electronics (IE) Software Department (SwD) has a vacancy for a Software Developer and Analyst.

FUNCTION DESCRIPTION

- Take ownership of the current Production Management System
- Analyse business process needs, define improvements
- Implement them using commercial available software applications or
- define requirements and develop an application

PROFILE

- Master in Industrial Science ICT, Computer Science or equivalent by experience
- Programming languages: Python, PHP, JavaScript... with focus on web development
- Relational databases such as MySQL is a must
- Project management experience
- Background knowledge of ERP and PLM systems is a plus
- Structured team player, eager to learn
- Long term commitment

OUR OFFER

You will join our Software Development Team and work in a challenging environment. Beside the several radar upgrade and measurement device projects the software team is also responsible to support the company with software tools making the company business processes running optimized and efficient. You will become responsible to implement and maintain the tools to support these processes.

Your salary will be competitive and evolve according to your experience, commitment and results.

Please send your CV and a letter of motivation to lesley.vandecruys@intersoft-electronics.com.
