

# System Engineer Radar Upgrades

**Intersoft Electronics** is a Belgian engineering company active in the domain of air traffic control (ATC) and air defence radar. It is our mission to create and deliver cutting edge solutions in this field and enable our customers to achieve comprehensive and reliable radar coverage leading to safer airways. Our products and services are used worldwide, supported by our global presence with subsidiaries in Australia, the US and China. Our **Radar Upgrades Department** is currently looking for a:

System Engineer

with good flexibility in skills for upgrading radars with new technology.

## FUNCTION DESCRIPTION

- You will help in improving the product by making it a complete package
- You are interested in designing systems by finding the best symbiosis between hardware and software
- You are able to steer different sets of specialists and have the flexibility to fill in the gaps where needed
- You can work independently and in group and are capable of taking the lead in on-site installations
- You are a problem solver
- You have good communication skills
- You are looking for a challenging job with opportunities all around the world

## PROFILE

- Master degree in Engineering or Industrial Sciences (electronics) or equal by experience
- 4 years of experience
- Good knowledge of analog and digital electronics, communication networks, virtual instrumentation
- Knowledge of PLC systems, Software languages, Linux
- Good organizational skills to assure on time delivery of quality critical projects
- Good knowledge of English, knowledge of other languages can be an advantage
- Willingness to travel worldwide (between 5 and 25% depending on ongoing projects)

## OUR OFFER

At first you will be involved in technically documenting the current solutions for internal and external training. After learning about radars and our solutions, you will be involved in on-site installations and measurement campaigns. With this experience you can gradually join the development team for the development of new solutions in the world of air traffic control.

Your salary will be competitive and evolve according to your experience, commitment and results. A company car is included in the package.

Please send your CV and a letter of motivation to the HRM department, at the attention of Johnny Zeven by e-mail [[jobs@intersoft-electronics.com](mailto:jobs@intersoft-electronics.com)] or regular post.
