# RASS® User
Work Group EUROPE

01 - 03 October 2024

INTERSOFT
ELECTRONICS

Connect with the community and boost your skills!

What's in it for me?
Yes, you!

The RASS® User Work Group brings together end users of the various suites of CNS test and measurement equipment with each other and with Intersoft Electronics experts.

The goal is to increase the level of user knowledge by participating in discussions, sharing experiences, collaborating on technology and learning directly from technical trainers and experts. The All participants will have the opportunity to present and discuss their own cases and applications of RASS® and provide feedback for the potential development of new and improved tools.

All in all, you will participate in a valuable learning experience with like-minded professionals.

CONFERENCE LOCATION

LISBON, PORTUGAL | more details will be shared at a later stage.

WHEN

1ST TO 3RD OCTOBER 2024

PROGRAM

You can choose from different group sessions, so you can configure your program to your specific interests, needs and level of experience.

IE is taking requests for additional topics until End August 2024!

If you are not sure what sessions to select or have further questions, please contact support@intersoft-electronics.com.
