

Intersoft Services establishes a branch in Germany

Wilhelmshaven, Germany – Intersoft Electronics Group today announced the establishment of **Intersoft Electronics Services GmbH**. That fits in the IE Group's strategy to better serve the local market and its growth ambition as a services provider for civil and military CNS and ATM.

Germany – and by extension the D-A-CH countries – is for Intersoft a strategic market with an extraordinary growth potential. Intersoft's customer base in the D-A-CH region grew steadily over the past decennium. Organizations ranging from the German Navy, German Air Force, via Skyguide, Deutsche Flugsicherung, RUAG and Austro Control to several other German defense and industrial companies are on the growing customer portfolio. Those customers can be much better served when operating directly out of Germany, out of their direct proximity, speaking their native language.

Intersoft Services GmbH will be led by Thorsten Oelgart. Mr. Oelgart boasts 25 years of experience in engineering, management and executive functions for Siemens, EADS, Airbus Defence & Space, Hensoldt and the Intersoft Electronics Group. This track record and his adept leadership will enable him to grow Intersoft Services business in the D-A-CH region.

Thorsten Oelgart, CEO Intersoft Services GmbH:

"With the ambition to grow Intersoft Services GmbH to a fully operational entity, contributing significantly to the Group's worldwide success, a double-digit number of workplaces will be created in Germany."

The offices of Intersoft Services GmbH are located in the historic marine buildings of Wilhelmshaven. The unique site with its refurbished offices is a great place to welcome customers and business partners and for the growing team an attractive modern workplace in direct customer vicinity.

About Intersoft Services

Intersoft Services offers services and consultancy for Radar and other CNS systems and ATM worldwide. Its most successful services are RASS® and SkyRF®, used for performance analysis and system monitoring. Intersoft Services also supports the integration and project business of Intersoft Electronics for the local market. Among those are system integrations of NGSP® and L-IESA® technologies with the German Navy and Hensoldt.

Intersoft Services is part of the Intersoft Electronics Group, founded in 1983 and ever since on the forefront of ATC and Military Radar technology.
