

Intersoft Electronics Group establishes a Services branch in Portugal

Lisbon, Portugal – Intersoft Electronics Group today announced the establishment of Intersoft Services IBERIA. That fits the strategy to better serve the local markets and expand global presence as a technology and services provider for civil and military CNS systems.

Intersoft Services Iberia consolidates in the acquisition of Telescan Telecomunicações e Sistemas, LDA. With almost 40 years of experience as a provider of technical solutions for airports and telecommunications, Telescan fits the Services strategy within the IE Group very well. The company will continue its existing business and extend its portfolio with the Products and Services within the IE Group.

Intersoft Services Iberia will be led by Carlos Prates, who has been the General Manager of Telescan since 15 years. He's looking forward to growing the company as part of the IE Group organization.

Carlos Prates, CEO Intersoft Services Iberia:

"Joining the IE Group was a no-brainer. Telescan has built expertise and a customer portfolio in the specific niche in which the IE Group is a leading technology and service provider. That opens new business opportunities."

Also Domien De Ruyck, Managing Director of Intersoft Electronics Services is convinced of the business potential of this acquisition.

Domien De Ruyck, CEO Intersoft Services:

"The foundation of Intersoft Services IBERIA is crucial in our strategy to serve our customers locally. With this acquisition we can better respond to the local needs in the Portuguese and Spanish speaking regions worldwide."
