

Ignite Innovation as a Prototype Technician at Intersoft Electronics!

At Intersoft Electronics, we're at the forefront of engineering excellence, specializing in air traffic control (ATC) and air-defence radar solutions. Our mission is to deliver cutting-edge solutions that ensure comprehensive and reliable radar coverage, making airways safer worldwide. We're on the lookout for a passionate and experienced:

Prototype Technician

Why Choose Intersoft Electronics?

Are you someone who thrives on challenges, values teamwork, and enjoys a dynamic work environment? At Intersoft, we offer more than just a job – it's a place to boost your life and make a real impact.

Your Role: Prototype Technician

As a vital member of our Manufacturing Engineering team, you will play a key role in bringing concepts to life by assist, assemble, and rework prototypes. Your hands-on skills will be crucial in the development and validation of innovative solutions in the fields of air traffic control and radar. With no boundaries, you'll be at the forefront of transforming ideas into reality.

Your Talents:

- Proficient in prototype assembly and testing.
- Hands-on experience with tools and equipment used in prototype development.
- Hands-on experience in surface mount soldering and rework of prototype PCB boards
- Ability to interpret technical drawings and contribute to the improvement of prototype designs.
- An open mind and eagerness to learn, ensuring adaptability to evolving technologies.
- Strong attention to detail, ensuring the precision and reliability of prototypes.

What We Offer:

- Congestion-free working environment with flexible hours, including the option to work up to 2 days at home depending on the job content.
- Engaging team activities with friendly colleagues.
- Varied job in a stimulating, high-tech working environment.
- Continuous opportunities for personal and professional development.
- Permanent position with a market-based salary, supplemented with company benefits.
