

At InterSoft Electronics, we're at the forefront of engineering excellence, specializing in air traffic control (ATC) and air-defence radar solutions. Our mission is to deliver cutting-edge solutions that ensure comprehensive and reliable radar coverage, making airways safer worldwide. We're on the lookout for a passionate:

Junior System Administrator

As a Junior System Administrator, you will be responsible for supporting our IT team and learning how to manage our IT infrastructure. You will develop your skills on the job and have the opportunity to grow into your role. Your mission is to manage efficient and secure IT systems while supporting all employees in their daily operations. Our systems and services are vital to the success of our organization!

Your Role:

- Providing daily support to users with software and hardware questions.
- Following up on open IT issues via Jira or Teams.
- Managing and maintaining basic IT systems, such as workstations and simple network configurations.
- Assisting with server management, network administration, and cloud solutions.

Your Talents:

- You have a bachelor's degree in IT or system administration (recent graduate? No problem!).
- You are eager to learn and have an interest in IT infrastructure and support.
- You communicate fluently in Dutch and English.
- You work meticulously, are solution-oriented, and customer-focused.
- Basic knowledge of network or system administration is a plus.

What We Offer:

- Guidance and coaching to help you grow into a fully-fledged System Administrator.
- Flexible working hours and the possibility of hybrid work.
- An exciting high-tech work environment where you can learn and grow.
- A competitive starting salary, complemented by additional benefits such as meal vouchers, group insurance, a company car, etc.
- A fun and supportive team to help you every step of the way.
